LETTER OF TRANSMITTAL.

PANAMA CANAL, DEPARTMENT OF HEALTH,
Ancon, Canal Zone, May 9, 1914.

GOVERNOR OF THE PANAMA CANAL,
Culebra, Canal Zone.

SIR: I have the honor to submit the following report of the department of health for the month of April, 1914.

The total number of deaths from all causes among employees was 27, divided as follows: Disease 22 and violence 5, giving the annual average per thousand of 5.52 and 1.26, respectively.

Among employees for the month of April of each year the annual average death rate per thousand was as follows:

	Total.	Disease.		Total.	Disease.
1905.....	10.95	-----	1910.....	13.04	8.62
1906.....	30.00	29.12	1911.....	9.38	6.42
1907.....	38.67	35.22	1912.....	11.38	8.77
1908.....	7.77	4.56	1913.....	10.29	4.84
1909.....	8.57	7.01	1914.....	6.78	5.52

The annual average death rate per thousand in the cities of Panama and Colon and the Canal Zone, including both employees and civil population, for the month of April of each year, was as follows:

1905.....	39.29	1910.....	19.73
1906.....	39.06	1911.....	17.74
1907.....	40.97	1912.....	17.21
1908.....	20.04	1913.....	21.18
1909.....	16.77	1914.....	22.33

In segregating according to race, the annual average death rate per thousand from disease among employees was: For whites 3.27 and for blacks 5.94, giving a general average for disease of 5.52. For the same month during 1912, the annual average death rate per thousand from disease among whites was 3.74 and blacks 10.48, giving a general average of 8.77; and in 1913 from disease among whites 2.82 and blacks 5.39, giving a general average of 4.84.

Among employees during the month, deaths from the principal diseases were as follows: Lobar pneumonia, 2; organic disease of the

heart, 2; tuberculosis, 4; typhoid fever, 1; leaving 13 deaths from all other diseases and 5 deaths from external violence.

One case of smallpox was removed from Pacific Mail steamship *Newport* on April 16, 1914, and recovered. With this exception, no cases of yellow fever, smallpox, or plague originated on or were brought to the Isthmus during the month.

Very respectfully,

CHAS. F. MASON,
Chief Health Officer.

REPORT OF THE DEPARTMENT OF HEALTH, THE PANAMA CANAL, APRIL, 1914.

VITAL STATISTICS.

DEATHS OF EMPLOYEES OF THE PANAMA CANAL AND PANAMA RAILROAD.

SANITATION.

PANAMA.

During the month there were 129 deaths chargeable to the city from all causes. This is a slight decrease over the preceding month.

There were 3 cases of typhoid fever reported during the month; there was also 1 death from this disease. No scarlet fever or diphtheria was reported or found.

The sanitary districts in the city have been changed, and in place of five we now have four, and each sanitary inspector has a sufficient number of laborers under his immediate jurisdiction so as to enable him to make a house-to-house inspection of all buildings in his district within seven days and remove therefrom all boxes and articles of like nature that might afford a breeding or harboring place for rats. All unnecessary receptacles which might afford breeding places for mosquitoes are also removed.

As shown in the report, 157 buildings were condemned as being either a menace to public health or safety; 35 of these buildings were demolished. The vast majority of the buildings condemned have been repaired and placed in condition to meet the requirements of the sanitary department by the owners. There are a large number of buildings in this city which are heavily infested with rats, and the owners of such buildings are being notified as rapidly as possible to the effect that their buildings must comply with the sanitary and building rules and regulations or they will be demolished.

The garbage-collection service was organized so as to cover the congested districts of the city and remove therefrom all garbage twice daily, and all garbage removed was carted to the public dump and cremated.

The number of square yards of streets cleaned is given as 300,000. This is estimated, as accurate figures of the area of the city are not obtainable at the time this report is made. It is proposed to have all the streets swept twice a day, and on those streets where traffic is heavy the work is attended to by hand cartmen.

There being only one street sprinkler available, it has not been possible to cover all the streets in the city, but the main thoroughfares have been sprinkled regularly.

Samples of milk from all known dairies in the city were taken and sent to the board of health laboratory at Ancon for analysis. Two of the samples submitted were found to be below the legal requirements, and all milk from this source has been condemned for public sale until such time as the milk meets the requirements of the department. Permits for the selling of milk wholesale and retail have been granted most of the dairies in the city.

During the month of May permits will be issued to all establishments engaged in the bottling of aerated or carbonated waters and nonalcoholic beverages as they comply with the requirements of the department.

The vaccination of school children was started during the month and is well underway.

Following is a summary of the routine work accomplished by the health office of Panama:

Mosquito work:

Linear feet of ditches cleaned.....	66,056
Linear feet of new ditches dug.....	201
Cubic yards of earth used in filling.....	54
Larvacide used.....gallons..	400
Crude oil used.....do.....	126

Garbage collection:

Loads of garbage from yards removed to dump and burned.....	1,089
Loads of garbage from cans removed to dump and burned.....	2,113

Buildings:

Plans for new buildings submitted to health officer and approved....	30
Permits granted for repairs to old buildings.....	101
Buildings condemned.....	157
Buildings demolished.....	35

Street cleaning:

Square yards streets cleaned daily.....	300,000
Square yards streets sprinkled daily.....	100,000

Vaccination:

Persons vaccinated.....	245

Pit closets oiled.....	12
Linear yards ditches maintained (open).....	1,940
Mosquito breeding places destroyed.....	15
Doses quinine tonic distributed.....	1,265

CANAL ZONE.

There has been an increase in the number of anopheles caught during the month, ascribable in part to increase of breeding with the onset of the rainy season and in part to active work at hand catching. The rainfall for April was 3.37 inches, as compared with 0.36 inch for March.

The banks of that part of Miraflores Lake adjacent to Pedro Miguel are being cut at an angle of three-fourths on 1, from the 55.5-foot level to that of 53 feet, in the hope that a depth of water and an amount of wave action sufficient to prevent mosquito breeding may be obtained, and much labor and material at present expended on treatment of the lake with oil and larvacide thus be saved.

A project for the permanent lining of about 19,000 feet of ditching in or about Gatun, 3,365 feet at Paraiso, 8,000 feet at Pedro Miguel, and 10,470 feet at Corozal is now awaiting executive approval, and work will be begun if this is received, although, because of the increasing frequency of rain now, it is not expected that the work can be completed this year.

The following is a summary of sanitary work performed and material expended during the month:

Work requests on quartermaster's department:	
Grass cutting.....	2
Screening.....	14
Miscellaneous.....	18
Work requests on engineering department.....	24
Work requests on other departments.....	5

Notices served to abate nuisances.....	79
Arrests for violation of sanitary regulations.....	4
Convictions.....	4
Building permits approved.....	8
Inspections of closets.....	3,059
Inspections of stores.....	297
Inspections of restaurants.....	80
Inspections of shops.....	198
Garbage cans emptied.....	166,650
Closets disinfected.....	6,566
Houses disinfected.....	4
Rat traps used daily.....	211

Adult culices destroyed in houses.....	11,278
Containers found with stegomyia larvæ.....	7
Larvacide used.....	gallons.. 5,969
Crude oil used.....	do. 22,491
Rats destroyed.....	545

QUARANTINE SERVICE.

One case of smallpox was removed from Pacific Mail Steamship *Newport* on April 16, 1914.

The plague situation on the west coast shows no apparent improvement. Heretofore, from Valparaiso south has been considered fairly clean. It is noted that a death from plague occurred at Santiago, Chile, slightly south of Valparaiso, on April 14, 1914, and one on April 15, 1914.

The plague situation in Habana, Cuba, shows no apparent improvement, but, on the other hand, seems to be on the increase. The total number of cases in Habana up to April 23, 1914, was 13. One case has also occurred at Artemisa, 35 miles west of Habana. The total number of cases notified for Cuba, as noted on the last bill received, is 16.

A case of plague was also reported at Caracas, Venezuela, on April 12, 1914.
